Good service, though I think you need to have coffee available for customers up front. It isn't always available.

I'm a cab driver and it is really hard to get a good mechanic that you can trust as a taxi driver that is very important. What we need is a fast and reliable service and that's exactly what I got from Saggu Automotive.. These guys have been taking care of my private car and my business car for about over 2 years, they have changed my engine, brakes, tires and hybrid battery, this guys are really good for what they do.....

I went to a couple of shops nearby looking to get the front disk brake pads replaced on my 2003 Toyota RAV4. One place told me it would be over \$500 to replace the pads and the rotors, if necessary, which was beyond my financial ability. The place across the street from Saggu said they didn't have time, and they had the parts in stock with three hours until closing. I just happened to see the Saggu shop when I left there, so I pulled in and inquired. The mechanics at Saggu were very friendly and professional. They were just finishing another car, so I handed them the key. I insisted on just getting the pads replaced, and was told that it would be done by 6PM, provided they could get the parts from the parts dealer. They ended up having to replace the rotors. When I showed up at 6, it was done. They showed me the old parts, which were severely worn. Total cost: half of what the other shop wanted. These guys rock. I highly recommend them. They saved the day.

Saggu shop does great work the first time around without giving you the runaround. Everytime i had issues with my car or a family members car, i brought it to him..... Great service, friendly people. Dam they now had to move to Perth Amboy, a bit a headache to go from walking distance now to driving distance but worth the effort.

Saggu Auto has got to be one of the best kept secrets in New Brunswick. If you are looking for a reliable Repair place this is it. I went in last month and am sorry i did not know of this place earlier. You are not over charged for the job, it is done right the first time and what i like most is the honest and courteous way Saggu Auto Repair operates.4 stars indeed!!!! Lou New Brunswick

This place is right down the street from me so they were a real big help when I couldn't get the car to start and had to push it over to them. They told me it was the alternator and fixed it the very next day. Gave me an invoice that was very fair and sent me on my way and I haven't had any problems with the car since.
